1- Press enter on keyboard while log in docent work - complete
2- chat icon not functioning , I can't send message - complete

3- - **Ad type**: We need two type only, one should appear in story and another should appear in trend only, so change (trend + story) to (Normal + Trend)
Now if I choose (trend + story) it will appear in both place this is wrong, also the naming is not shown in the language management, because we might change these existing name (trend, normal, Story)- complete

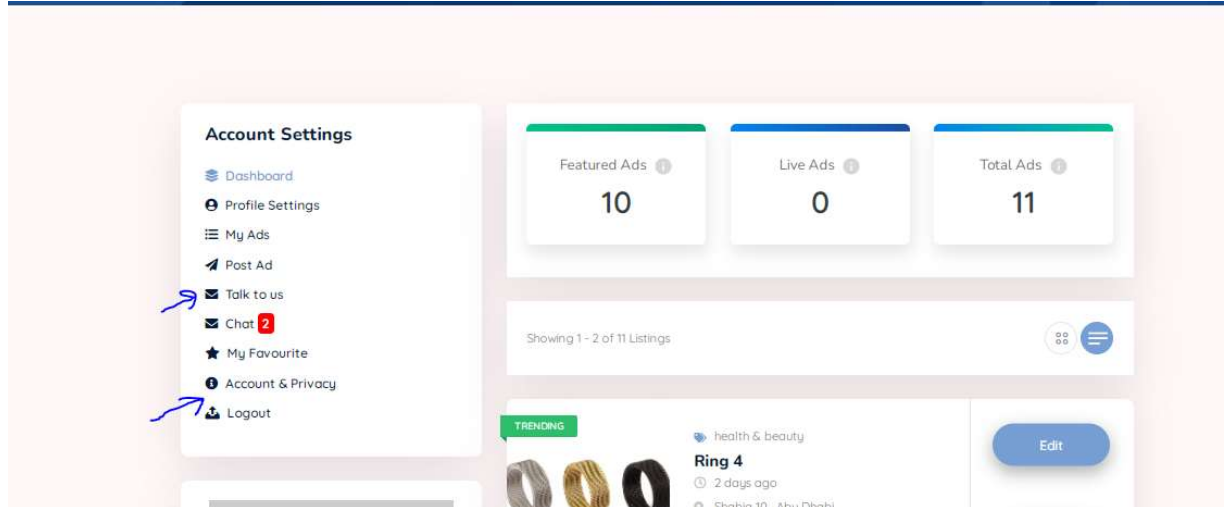

4- **When choosing this view (as shown below) picture become more stretch and therefore picture doesn't look good (if the whole view size is minimized a bit I think it will look better)**

5- When I send a message thru the message box I don't want to go out of the page, to messages, i want to stay in the same page, it should me a simple click. - complete
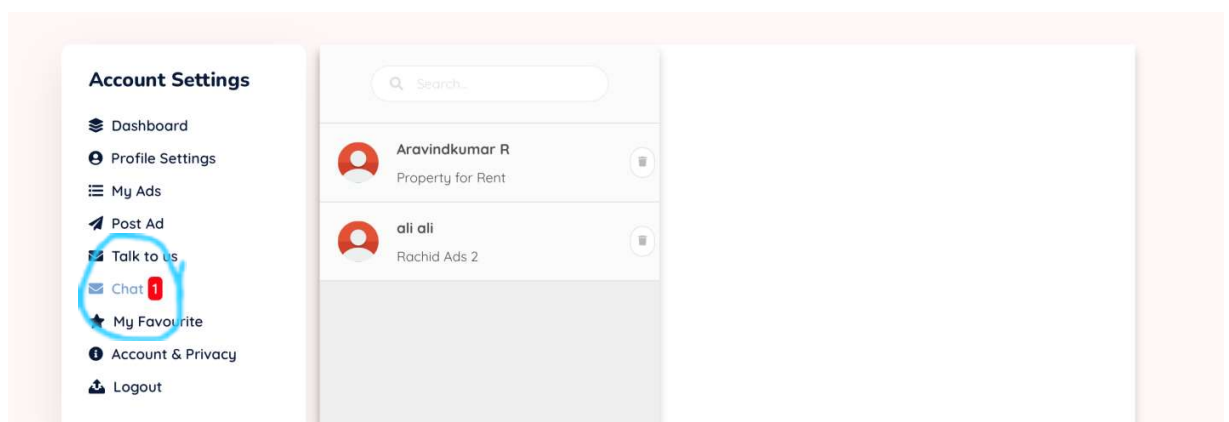

6- Place **"Talk to us "** the chat with admin before logout- complete

7- When clicking in load more in home page Increase the number of ads showing to 21 and then if clicked load another 21 will appear and so on. - complete

8- in the backend for chat with costumer , we need notification in dashboard or in chat customer column to notify us of any new message

9- Email notification for chat, report, new post.

10- fix the sizes - complete

11- this chat notification is from who? You need to show the user which sent u the chat? - complete
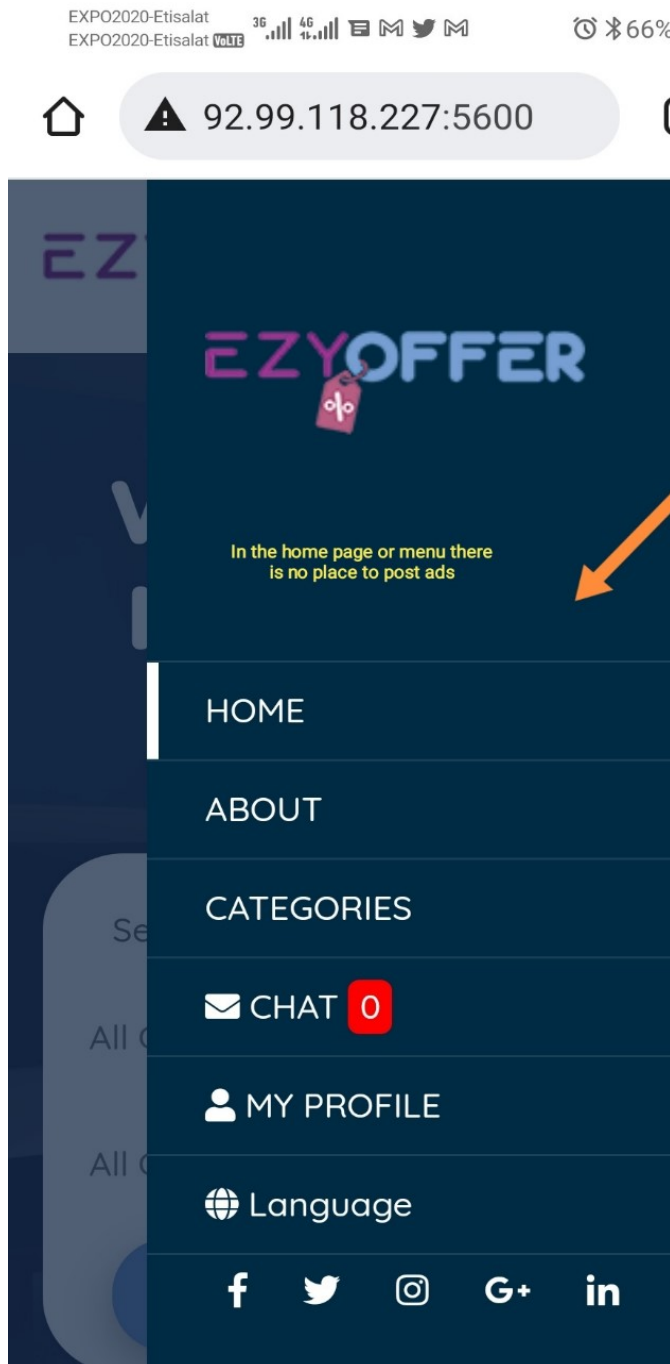

12- Show upload progrees bar

13- Preview the image in the chat

14- Padding for the attachment and clear the upload history, and upload action validation
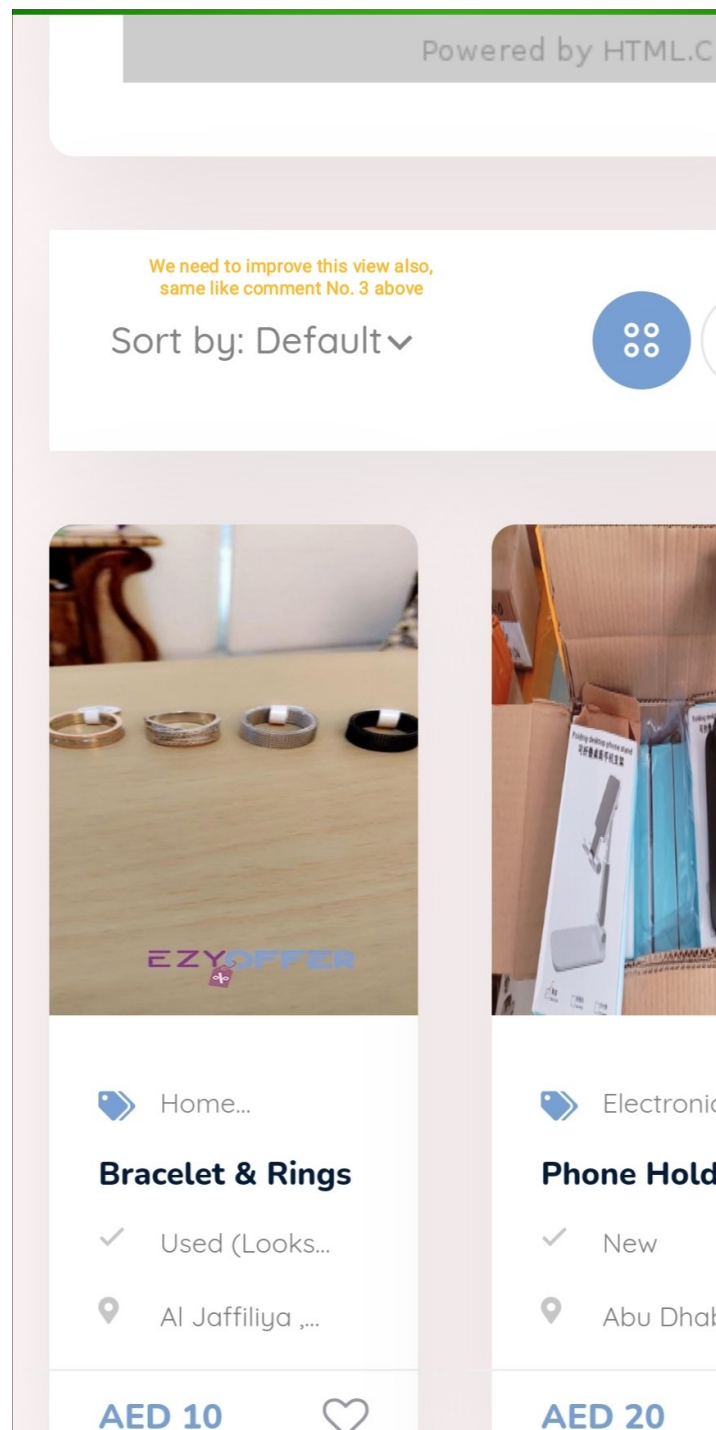

15- Check if pdf can work

Mobile view

- Post your ads is not appearing in home page or the menu

- This is same as point No.3 above we need this type of view to be more better

We need to improve this view also,
same like comment No. 3 above
